

Further thought and consideration has lead me to believe it wise to go further out on a limb and implore all Shareholders who voted in support of this settlement agreement to send a letter rescinding their votes in support of this unknown agreement.

It is **CRITICAL** that we take into consideration the following:

Regardless of whether the Chairman of the Trust Team, Dudley Whitehorn signs the agreement; the de facto Osage Nation Congress will approve or disapprove his decision. (They have the last word)

CONTRARY TO FEDERAL LAW

It is a very good possibility that the “scheme” is to allow Mr. Whitehorn to take full responsibility by way of his signature for the demise of the Osage Mineral Estate.

This would alleviate the de facto Osage Nation government from having to take ownership of their intended mission.

THERE IS ALWAYS A FALL GUY
