

## **The Problem With Sugar Loaf Mound**

1. Congress didn't appropriate funding for this purchase so Jim Gray found the money elsewhere. The tribe paid \$235,000.00 for this supposed "undisturbed" ancient mound that "supposed" Osage built but can't be proven.
2. The property is not on trust land so we are responsible for yearly property taxes of which we have no idea the amount.
3. Property insurance
4. Liability insurance
5. Maintenance such as mowing, and structural upkeep
6. Who checked the water pipes this winter? Who is maintaining and watching over this quarter of a million dollar piece of property owned by us?
7. What is the cost of upkeep?
8. What are we going to do with it?
9. How can it be "undisturbed" when a black top drive winds its way up to the top to reach the house that was constructed on it?
10. What about the right of way that slashed right through the mound to make way for electric lines?
11. Not only has this questionable hill been disturbed, this entire act of defiance is disturbing.
